EnigmaWarsaw is inspired by the unusual story of an unusual city: Warsaw.

Just a few cities on Earth have changed as much as Warsaw; after being almost totally razed to the ground in World War II, it was rebuilt and completely changed, becoming a much different place than it had been previously. Now under the present city is hidden the second, non-existent one. Our game gives you the opportunity to get to know both of them at the same time, and to visit Warsaw in an active and original way.

EnigmaWarsaw takes place in the centre of the capital, but covers more than just the usual sights: it's a magical journey into the depths of Warsaw, in search of the traces of the former city. One of our basic routes starts near The Palace of Culture and Science and ends at Pilsudski Square; others include Grzybowski Square, Powstancow Warszawy Square and Mazowiecka Street.

The choice of route and scenarios depends upon the number of the participants and wishes of the group. The scenarios can be customized and modified according to the group's needs. To request the game or ask a question please write to enigma@staypoland.com. We will give you all important information.
